Variations and Special Exception Requested from BZA
MR-4B Zoning, pending approval
January 4, 2017

A. Requesting a variation to reduce side yard setbacks from 15' to 7.5'
B. Requesting a variation to reduce rear yard setbacks from 20' to 6'

Variance A Description: Reduce side yard setback
Section 16-35.010 (2) states that "MR-3, MR-4B and MR-5B: Minimum depth of 15 feet, except that the side yard may be reduced to zero feet when a residential use has no residential windows adjacent to such yard." For this particular lot, a setback of 7.5 feet is requested for several of the buildings along the north edge of the property that include windows. There are other side yards in the property that have no windows and therefore do not need a variation. The adjacent property to the north is owned by the same entity and is an already constructed phase of the same development. There is an alley that provides access to the proposed 9 buildings in the proposed phase and the buildings with the requested 7.5’ side yard will be adjacent to this alley. As a result the distance between buildings of the previous phase and the proposed phase are still 30’ apart. This variance if granted meets the intent of the Zoning Ordinance and does not cause detriment to the public good.

Variance B Description: Reduce rear yard setback
Section 16-35.010 (3), referring to rear yard requirements, specifies that "MR-4 through MR-5A and MR-6: Minimum depth of 20 feet." For this particular lot, a rear yard of 6 feet is requested. The property is adjacent to a long-term industrial use, and along that east edge of the property is a steep incline. The adjacent property will be roughly 10 feet below the proposed property. As such the difference in height both helps deflect sound and provides a visual break between the uses. The reduced rear yard does not cause harm to the public good, and is consistent with the intent of the Zoning Ordinance for higher-density housing in MR-4B.
