COUNCIL DISTRICT _______ APPLICATION NUMBER V-17-365

NPU ______________________ DATE FILED ________________

John Fretwell
Name of Applicant

BUILDING PERMIT AUTHORIZING
Addition to a single family dwelling

at 615 Hillpine Drive NE 17th/52
Street Address Quadrant District & Land Lot

to be used for Residential purposes

The property is zoned R-4 District

2. The Building Permit Was Denied For The Following Reasons:

Applicant seeks a variance from zoning regulations to 1). Reduce the required east side yard setback from 7 feet to 5 feet. 2). To reduce the required half depth front yard setback from 17.5 feet to 0 feet to construct a carport.

Applicant seeks no other variances at this time.

A complete plan review was not conducted.

SUMMARY & JUSTIFICATION FOR VARIANCES

Directions: Complete responses must be provided for ALL questions. Incomplete applications will not be accepted. The space below may be utilized or responses may be submitted as a separate attachment. Specific criteria for Board approval of variances may be found on page 7. The justification must address these criteria. Please submit a typewritten or legible justification.

State whether the property described in this application is subject to a pending application or ordinance for a Rezoning or Special Use Permit. ☑ YES  ☑ NO. (If yes, the variance/special exception request will be rescheduled to a hearing following the final approval by City Council & the Mayor.)

Summary of proposed construction changes to buildings or site (shall not replace submittal of written criteria). (Examples: “Convert a 100’ x 200’ retail space into a restaurant.” “Install a 6-foot high opaque wooden wall, (‘privacy fence’ with 6-foot high opaque wall gates.”)

Requesting Variance and Special Exception (if required) to add parking and turn around pad within half front side yard for access to existing garage.

Proposed Lot Coverage (After Construction): Calculate total amount of lot coverage on entire property, after completion of proposed construction, including existing and proposed buildings and other structures; sidewalks, driveways, parking pads, patios, gravel, etc., everything except natural planted or undisturbed areas.

\[
\text{4637 covered square feet} \div \text{12544 total lot square feet} = \frac{37}{\%} \text{ proposed lot coverage}
\]

\[
\text{50}\% \text{ maximum allowed lot coverage}
\]

\[
\text{V\cdot17\cdot365} \quad \text{DEC 20 2017}
\]

Variance Criteria (see page 6 for detailed criteria):

1) What are the extraordinary and exceptional conditions pertaining to the particular piece of property in question (size, shape or topography)? Very large tree within RDU precludes adding driveway to side of property. Addressed street predominately and narrow lot limit areas available for development of any additional access to the property must occur from collector street.

2) How would the application of the Zoning Ordinance of the City of Atlanta to this particular piece of property create an unnecessary hardship? The zoning ordinance precludes parking in front or half-front yards and limits heights of retaining walls within side yards. (topography precludes having retaining walls > 6' or > 3' x 2' (stepped)).

3) What conditions are peculiar to this particular piece of property? Existing oak w/ R Ellison being preserved; topography; size, shape and setback measurements.

4) Submit facts to show that relief, if granted, would not cause substantial detriment to the public good or impair the purposes and intent of the Zoning Ordinance of the City of Atlanta. Relief would create a much safer ingress/egress condition for the owners as well as for collector street and pedestrian traffic. Intent is to make finished product compatible with neighborhood fabric.

Variance Justifications for Renovation and Addition at 615 Hillpine Drive NE, 30306

Prepared by: John P. Fretwell, Owner/Architect  
RE: 615 Hillpine Drive NE, Atlanta, GA 30306  
Atlanta Building Permit BB-201608739  
DATE: 20 December 2017

The referenced property is under permit for a significant renovation and addition to house a single family. The property currently has a circa-1950s ranch style house that is being largely retained and renovated. An addition will include a family room and bedrooms. The existing structure has a single car garage (basement) that is accessible via a narrow driveway from Monroe Drive only. The driveway does not accommodate a turnaround, and currently the only way to exit the garage and drive is by backing directly onto Monroe Drive, a busy four-lane road.

The Owners seek to add a concrete pad of sufficient depth to accommodate parking a single vehicle while maintaining enough depth for the garage-parked car to make a three-point turn and exit the driveway to Monroe facing forward. The pad would be approximately 13.5 ft. by 29.5 ft., would be located within the half-front-yard-depth side yard, and would require retaining walls. The height of portions of the retaining walls as well as the parking pad within the side yard do not comply with provisions set forth in Section 16-28.008 of the City of Atlanta Zoning Ordinance.

The significant factors contributing to this Variance Application include:

- 54" diameter water oak tree: An enormous oak and its canopy dominate the front yard of the house; it is situated between the property line and Hillpine Drive curb line, within the ROW. The Owners initially preferred to add a semi-pervious driveway on the Hillpine Drive side of the property (all other houses on Hillpine Drive have driveways on that street). After consulting builders and an arborist, it became apparent that the addition of a vehicle drive of any type, and even significant construction activity on private property, could impact the tree's health. The Owners intend to serve as stewards for this particular component of the urban tree canopy. The building permit for the property would not have been granted without significant effort to protect the tree's Critical Root Zone. Under these circumstances, constructing a drive on the tertiary residential street was not an option, so the existing drive from the collector street would have to be utilized. During the course of preparing the construction documents for the addition, it became apparent that simply using the drive, parking, and reversing out of the drive would present a dangerous condition for the Owners and would also present a danger to northbound traffic on Monroe, as well as frequent passers-by and cyclists.

- Lot Size and Setbacks: The lot is a narrow wedge-shaped corner lot. The corner location requires a deeper side yard (one-half of 35 ft. front yard) than the common side yard (7 ft.). Great effort was made to design the addition to the house such that current setbacks were adhered to and used the buildable-envelope guides to work within. The existing house—which is being incorporated into the renovation—completely fills the usable width of the lot, limiting access from front to back, and making additions to the width of the house impossible. An effort was made to fit a turn-around pad only within the Atlanta Z.O. requirements, but it was not possible to add a pad for turn-around without also
recognizing it as a car park pad as well, which would require a Special Exception permit for the R-4 zone. Adding a pad large enough to accommodate a vehicle as well as turn-around space would prove difficult due the site topography.

- Topography: Hillpine Drive is a steep grade. 615 Hillpine occurs at the lowest point of this grade. From the western (Monroe Drive) side of the house, the drop is approximately 7 feet, plus a 2 ft. retaining wall to the sidewalk grade. This grade change occurs within the full width of the side yard setback (17.5 ft.). The existing grade also represents a sight-line challenge for the Owner when exiting the driveway. The design associated with the Variance Application would mitigate this issue for the sight-lines to northbound (oncoming) traffic.
