SUMMARY & JUSTIFICATION FOR VARIANCES

Directions: Complete responses must be provided for ALL questions. Incomplete applications will not be accepted. The space below may be utilized or responses may be submitted as a separate attachment. Specific criteria for Board approval of variances may be found on page 7. The justification must address these criteria. Please submit a typewritten or legible justification.

State whether the property described in this application is subject to a pending application or ordinance for a Rezoning or Special Use Permit. YES ☑ NO. (If yes, the variance/special exception request will be rescheduled to a hearing following the final approval by City Council & the Mayor). Please provide the relevant zoning number associated with the subject property: ____________________

Summary of proposed construction changes to buildings or site (shall not replace submittal of written criteria). (Examples: "Convert a 100' x 200' retail space into a restaurant." "Install a 6-foot high opaque wooden wall (‘privacy fence’ with 6-foot high opaque wall gates.”). Remove existing house and driveway - replace with new residence and repour driveway in same configuration. Existing one-car garage will be removed but walls will remain (probably reconstructed) as retaining walls around driveway turnaround.

Proposed Lot Coverage (After Construction): Calculate total amount of lot coverage on entire property, after completion of proposed construction, including existing and proposed buildings and other structures; sidewalks, driveways, parking pads, patios, gravel, etc.; everything except natural planted or undisturbed areas.

4010 covered square feet / 8040 total lot square feet = 49.9% proposed lot coverage

50% maximum allowed lot coverage

Variance Criteria (see page 6 for detailed criteria):

1) What are the extraordinary and exceptional conditions pertaining to the particular piece of property in question (size, shape or topography)? The lot is much smaller than the 9000 sq ft lot minimum at 8040 sq ft and, at 47.68', it is much narrower than the 70' minimum frontage for R-4. The lot is also narrower than the surrounding 50' wide lots and slopes down front to rear, very sharply near the rear.

2) How would the application of the Zoning Ordinance of the City of Atlanta to this particular piece of property create an unnecessary hardship? Our lot is narrower than our neighbors and we have an existing house that is 2.6' feet from the south side lot line. We are proposing that the new house have a 3.5' setback (and the house will be slightly inside that line). The front of the new house will match the location of the existing house (new front porch will be larger than existing).

3) What conditions are peculiar to this particular piece of property? This lot is narrower than the neighboring 50' wide lots and the new house is narrower than the house it replaces. No trees will be removed and only very minor grading will take place other than the footprint of the house itself.

4) Submit facts to show that relief, if granted, would not cause substantial detriment to the public good or impair the purposes and intent of the Zoning Ordinance of the City of Atlanta. The house replaces an existing house with a house that provides more off-street parking on a cut-through street with many rental houses (including multi-family nearby).
EXISTING CONDITIONS AT 1450 LANIER PLACE

Left side of 1450 Lanier Place is currently 2.6' from side lot line.
Rear yard - note three trees have been removed over the years (DDH)
