REFERRAL CERTIFICATE

COUNCIL DISTRICT 60 APPLICATION NUMBER V-18-2260
NPU F DATE FILED 07/13/2018

Mr. Bennett Suggs
Name of Applicant

BUILDING PERMIT AUTHORIZING
Alteration to an accessory structure

at 1084 Berkshire RD NE 17th/3
Street Address Quadrant District & Land Lot
to be used for Single-Family Residential purposes
The property is zoned R-3 District

2. The Building Permit Was Denied For The Following Reasons:

   Applicant seeks variance from the zoning regulation to: (1) increase the maximum size of an
   accessory structure from 30 percent of the main structure to 36 percent of the main structure.

   A complete plan review was not conducted.

   Applicant seeks no other variances at this time.

NOTARY PUBLIC
SUMMARY & JUSTIFICATION FOR VARIANCES

Directions: Complete responses must be provided for ALL questions. Incomplete applications will not be accepted. The space below may be utilized or responses may be submitted as a separate attachment. Specific criteria for Board approval of variances may be found on page 7. The justification must address these criteria. Please submit a typewritten or legible justification.

State whether the property described in this application is subject to a pending application or ordinance for a Rezoning or Special Use Permit. YES X NO. (If yes, the variance/special exception request will be rescheduled to a hearing following the final approval by City Council & the Mayor). Please provide the relevant zoning number associated with the subject property: ________________

Is the proposal subject to Inclusionary Zoning? YES X NO

Summary of proposed construction changes to buildings or site (shall not replace submittal of written criteria). (Examples: “Convert a 100’ x 200’ retail space into a restaurant.” “Install a 6-foot high opaque wooden wall (‘privacy fence’ with 6-foot high opaque wall gates.”)

Move 2,000 sq ft walls during reconstruction after fire — adding ~ 1,200 sq ft to accessory structure (35% to 36% of main structure)

Proposed Lot Coverage (After Construction): Calculate total amount of lot coverage on entire property, after completion of proposed construction, including existing and proposed buildings and other structures; sidewalks, driveways, parking pads, patios, gravel, etc.; everything except natural planted or undisturbed areas.

N/A covered square feet / ___________ total lot square feet = _______% proposed lot coverage

% maximum allowed lot coverage
No changes to existing

Variance Criteria (see page 6 for detailed criteria):

1) What are the extraordinary and exceptional conditions pertaining to the particular piece of property in question (size, shape or topography)?

________________________________________________________________________

2) How would the application of the Zoning Ordinance of the City of Atlanta to this particular piece of property create an unnecessary hardship?

________________________________________________________________________

3) What conditions are peculiar to this particular piece of property?

________________________________________________________________________

4) Submit facts to show that relief, if granted, would not cause substantial detriment to the public good or impair the purposes and intent of the Zoning Ordinance of the City of Atlanta.

________________________________________________________________________
Summary & Justification For Variances

Summary of proposed construction changes to building:

Increase usable square footage of an existing accessory structure by 1% during the reconstruction of the structure after damaged by fire. The existing accessory structure already exceeds the 30% allowable floor area of the main structure and is currently @35% and requesting 36% after modification. Two non-load bearing knee walls in the bathroom area were relocated into the sloped roof/ceiling resulting in an additional 12 square feet; to increase the shower stall from 48" x 36" to 48" x 48" and the relocation of the toilet to allow space for a bathroom sink.

- The main house was built in 1939 (original drawings exist and the footprint has not changed). The prior owner of the property converted the garage, then part of the main house, into a family room and built a detached garage/bonus room (note: the changes and the detached garage/bonus room were permitted by the City of Atlanta No. B8605713, dated 09/15/86). The square footage of the main house is 3277 sqft (based on exterior building dimensions less attic space in the upper level)
- The car garage is 691 sqft. The bonus above the garage (heated space - insulated floor area) is also 691 sqft; the usable finished floor area as built is 467 sqft. or 447 sqft (5 foot rule as prescribed by Fannie Mac/ANSI Z765, which states that only areas where a sloped ceiling exists and is greater than 5 foot is counted as square footage). The additional finished floor area is 15 sqft. or 12 sqft (5 foot rule).

Considering heated area as overall square footage, then no square footage was added with the relocation of the knee walls in the bathroom.

Considering usable finished floor area, an additional 12 square feet has been added (a 1% increase in square footage of the finished area).

There are No changes or modifications to the accessory structure's exterior or footprint - changes wholly to interior modifications.
Variance Criteria

1. What are the extraordinary and exceptional conditions pertaining to the particular piece of property in question:
   a. A fire occurred in the bonus room above a detached garage due to fire. The damage was restricted to the bonus room's interior requiring all drywall, insulation, windows/doors, plumbing fixtures and wiring replaced; the framing was undamaged and fully serviceable.

2. How would the application of the Zoning Ordinance of the City of Atlanta to this particular piece of property create and unnecessary hardship?
   a. The bonus room is comprised of two intersecting gable roof structures (@ 90 degs. to each other) originating at floor elevation about the perimeter walls of the garage. This results in mostly sloped ceilings/walls to the floor with some knee walls. This design substantially reduces useful square footage.
   b. A contractor was hired to handle most aspects of the project and the contract indicated that all permits were to be obtained by the contractor. I, the owner, agreed to get permits for mechanical and plumbing as I was handling this work. I assumed that the contractor got a building permit. I was unaware of the .3 times code of the accessory structure to the main structure, so I moved the knee walls, installed the shower pan, relocated the toilet and bath sink and installed new HVAC lines. Upon obtaining City of Atlanta rough-in inspection, the inspectors indicated that a building permit (which I thought existed) was needed. The mechanical and plumbing rough-in inspections have passed (as well as electrical, handled by contractor). Upon seeking to obtain the building permit, I was told at the zoning office that I needed a variance because the structure was too large relative to the main building. Not obtaining a variance will require considerable work and expense to relocate the knee walls to their original position and would require the removal and replacement of all plumbing - just to reduce the square footage by 1%.

3. What conditions are peculiar to this particular piece of property?
   a. None as it relates to the variance sought

4. Summit facts to show that relief, if granted, would not cause a substantial detriment to the public good or impair the purposes and intent of the Zoning Ordinance of the City of Atlanta.
   a. There are no changes to the exterior of the building or to the property - changes would be invisible to the community
   b. The change in square footage is minimal and does not substantially change the existing ratio of accessory structure relative to the main structure, nor does this change the use or potential use of the accessory structure
