SUMMARY & JUSTIFICATION FOR VARIANCES

Directions: Complete responses must be provided for ALL questions. Incomplete applications will not be accepted. The space below may be utilized or responses may be submitted as a separate attachment. Specific criteria for Board approval of variances may be found on page 7. The justification must address these criteria. Please submit a typewritten or legible justification.

State whether the property described in this application is subject to a pending application or ordinance for a Rezoning or Special Use Permit. ___ YES  ___ X  NO. (If yes, the variance/special exception request will be rescheduled to a hearing following the final approval by City Council & the Mayor). Please provide the relevant zoning number associated with the subject property: ________________________

Summary of proposed construction changes to buildings or site (shall not replace submittal of written criteria). (Examples: “Convert a 100’ x 200’ retail space into a restaurant.” “Install a 6-foot high opaque wooden wall (“privacy fence” with 6-foot high opaque wall gates.”).

As part of a new single-family residential construction, we propose to reduce the rear yard setback from 15’ to 4’ in order to expand a standard 22’x22’ two-car garage by 12’ to include a woodworking shop in the rear on grade. The shop is for a hobby, not a professional practice.

Proposed Lot Coverage (After Construction): Calculate total amount of lot coverage on entire property, after completion of proposed construction, including existing and proposed buildings and other structures; sidewalks, driveways, parking pads, patios, gravel, etc.; everything except natural planted or undisturbed areas.

4942 covered square feet / 9949 total lot square feet = 49.7% proposed lot coverage

50% maximum allowed lot coverage

Variance Criteria (see page 6 for detailed criteria):

1) What are the extraordinary and exceptional conditions pertaining to the particular piece of property in question (size, shape or topography)? see attached justification letter

2) How would the application of the Zoning Ordinance of the City of Atlanta to this particular piece of property create an unnecessary hardship?

3) What conditions are peculiar to this particular piece of property?

4) Submit facts to show that relief, if granted, would not cause substantial detriment to the public good or impair the purposes and intent of the Zoning Ordinance of the City of Atlanta.

Board of Zoning Adjustment and staff of the Planning Department
City of Atlanta
Department of Planning and Community Development
Bureau of Planning
55 Trinity Avenue, Suite 3350

RE: 1282 Pasadena Ave (DeKalb Co) - Request for Variances from City of Atlanta zoning ordinance to reduce R-4 rear yard setback from 15’ to 4’ to allow the construction of new detached accessory structure (one-story garage w/ workshop) along with a new primary house construction.

Dear Board members and staff:

We meet all of the criteria that the zoning ordinance requires the BZA to base its decision upon:

(1) there are extraordinary and exceptional conditions pertaining to the particular piece of property in question because of its size, shape, or topography;

The lot slopes steeply up at the front and rear edges and, at 58.25’ wide, is narrower than the minimum for the zoning and narrower than the average lot in the area. The frontage is 60.42’ but the front lot line is at a substantial angle from the side lot lines and is on a curved part of the street.

(2) the application of the zoning ordinance of the City of Atlanta to this particular piece of property would create an unnecessary hardship;

The lot is narrower than many in the area and, at 9949 sq. ft., is barely over the zoning minimum lot size. The owners are moving from another part of the Morningside neighborhood to build a new house on this lot and part of the enjoyment of the new house is the woodworking shop which is currently housed in their small basement. They wish to expand the workshop to 12’x22’ and the logical place (since the heavy machines need to be on slab) would be to expand the proposed 22’x22’ one-story garage to 22’x34’ (748 sq. ft.).

(3) such conditions are peculiar to the particular piece of property involved;

The lot is narrower and smaller than many in the area and, while the new house, garage, and driveway would normally be within the zoning requirements, the full enjoyment of the new house is dependent on the expansion of the garage to include the workshop. There will be a sink in the new workshop but no toilet. The garage structure does not encroach the side setback in order to preserve the existing 10” tree on the northwest corner of the lot. Two other large existing trees in the rear yard and the specimen tree within the right-of-way in the front will also be saved by having the driveway on this side of the lot. The trees being removed include a 28” tree which is currently just a tall stump since a large branch severely damaged the existing house, other DDH trees (those three have already been permitted for removal) and two live trees next to the existing driveway which are currently growing through a chain link fence and would be dangerously impacted by the construction of the new house.
(4) relief, if granted, would not cause substantial detriment to the public good or impair the purpose and intent of the zoning ordinance of the City of Atlanta.

The owners are long-term residents of the Morningside area and this new house is a result of their desire to stay within the neighborhood while their needs have changed. This contribution to neighborhood stability is consistent with the intent of the zoning ordinance.

Thank you for your consideration,

David W. Price, Applicant
